

The Institution of  
Green Engineers

## PARTNERS PROFILE BOOK 2021

IGEN GREEN9 Working towards United Nation Sustainable Development Goals 7 and Connect SDGs

# WELCOME TO IGEN PROFILE BOOK

---

## About IGEN

The Institution of Green Engineers (IGEN), a nonprofit organization working wholeheartedly and with all sincerity for the cause of the environment to promote a cleaner and greener world.

IGEN plays an active role in connecting professionals working with Green Technologies and is proudly registered under Societies Registration Act 27 of 1975 vide Registration No: CN/SR/3032019.

It works towards achieving UN Sustainable Development Goals (3,4,6,7,9,11,12,13 & 17), strives to be a part of Government policy drafting as a solution provider, develops Innovative products under Make in India initiatives which leads to a sustainable Greener world and organizes innumerable activities through VIBBGYOR society.

Serve as a catalyst to connect all professionals for building a greener world.

To bring together all the professional practitioners working for creating a green community. To provide sustainable environmental solutions to achieve a green world. To inspire, inform and influence the global engineering community to adopt green engineering practices in their design, product, process and systems.

Many like-minded groups are connected together to achieve global goals.

---

## About ENSAV Club

ENergy Efficiency Research Group (GREEN9) formulated in the year 2016 and initiated the energy efficiency activities from 18th June, 2016. In the year 2019, GREEN9 affixed it with a Registered Professional Society named as "The Institution of Green Engineers"(IGEN) (Registered under Societies Registration Act 27 of 1975, wide Registration No: CN/SR/3032019). In order to provide the best solution for UN SDG Goal 7 and target 7.2, IGEN-GREEN9 started the new club and named as Energy Saving Avarness Club (EnSAv Club)

EnSAv (Energy Saving Avarness) Club focuses on bringing about a first-hand realization of the energy crisis and scarcity of natural resources in the country. With the increasing demand for energy, effective management and conservation of the same has become the need of the hour.

Energy Saving Avarness Club allows the student to showcase their talents and concern towards energy conservations and importance of implementing renewable sources. As students, parent and teachers are being sensitized towards "energy conservations" issues that confront each one of us , today. Today, along with energy conservation, we are sensitizing students about resource scarcity, and effects of CO2 emissions.

The Objective of EnSAv Club is

To facilitate club students to achieve energy ambassador certificate through SOU/Day Audit

To implement energy efficiency projects to the nearby societies

To publish the concluded project outcome in indexed Journals

IGEN-GREEN9, Unit of VIBBGGYOR Society, have served the Community for over 7 years in the field of Energy Efficiency Research and Energy Conservation activities. This resulted 24EnSaV (Energy Saving) clubs in colleges and schools , more than 200 events, 10 village adaptation, promotion of 9mantras, research projects, which resulted the outcome of 2L unit saved, 25 research publication, 2 village declared as energy saver village, created energy conservation awareness with 25L people and many more on energy efficiency. To witness the SDG 7,9,13 activities towards IGEN GREEN9 ENSAV Clubs, we had organised first IGEN GREEN9 SDG CONCLAVE 2020.

---

## Message from President

The Institution of Green Engineers is happy to provide the best solution for UN SDG Goal 7, which insists about ensuring access to affordable, reliable, sustainable and modern energy for all. According to a report in 2019, the world is making progress towards achieving SDG 7, but will fall short of meeting the targets by 2030 at the current rate of progress. SDG 7 and Climate change mitigation (SDG 13) are closely related and complementary.

In association with this and to support SDG 7, IGEN-GREEN9 initiated club activities and started its first Energy Saving Awareness Club (EnSAV Club) in the year 2016 at Dr.M.G.R.Educational & Research Institute, which further expanded to 24 clubs (in the year 2021) across India. The action of the ENSAV Club results in 2000 student members, 300 faculty members, 150+ plus awareness events, 21 days energy conservation event, energy ambassador program, IGEN GREEN9 SDG Conclave and GREEN9 Awards.

We EnSAV club are delighted to release IGEN GREEN9 ENSAV Club Profile Book 2021, which will represent the organizers of ENSAV clubs in the respective colleges. We take this as an opportunity to appreciate the club organizers who contributed in the year 2020 and advance wishes for year 2021.

**Dr.L.Ramesh**

---

## Message from vice president

United Nations have coined 17 SDG goals for sustainability. IGEN - organisation work on these goals symbolising nine Mantra's.

Climatic change is the talk of the town and everyone is talking about green technologies and greener world, but they performing their CSR activity. The Institution of Green Engineers has dedicated them self in nurturing as well as developing new products in containing carbon emission. one such example is One unit Save Mantra , which is practised by many volunteers globally in conserving 1.3Kg of CO2 emissions equivalent or approx 700 Litres of water. The world is looking at converting all the automobiles into electric vehicles but IGEN motivates the people to use bicycles wherever required and fuel their vehicles with universal source of energy generated through green technologies. Many cycle rallies with corporate teams have clearly made a good impression on SDG goals 7 and 13.

Phantom Power or Ghost power which is a menace to the society as to be eradicated which consumes more power than the expected conception. Energy pyramid clearly depicts the basement is energy awareness the second is improvement of efficiency and the third is layered with renewable energy resources.IGEN works for SDG goals improving overall efficiency of the system with technological innovation cell, campaigns on energy conservation and conversion of energy resources through renewable resources performing research on microgrid electric vehicles and other upcoming green technology innovations.

**Dr.Balamurugan**
